

Adjusting the Camera for Recording (0050)

Step 1: Open the Logitech Software

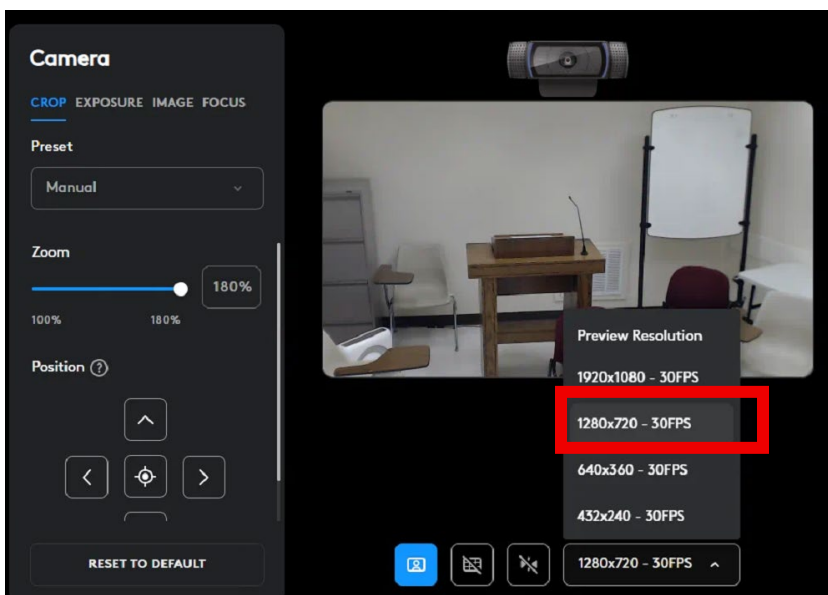

1. Open Logitech GHub, located on the Desktop

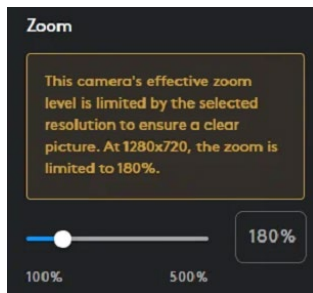

2. Select the “C920” icon

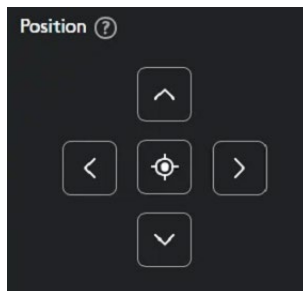

3. Check/set the resolution to “1280x720 – 30FPS”

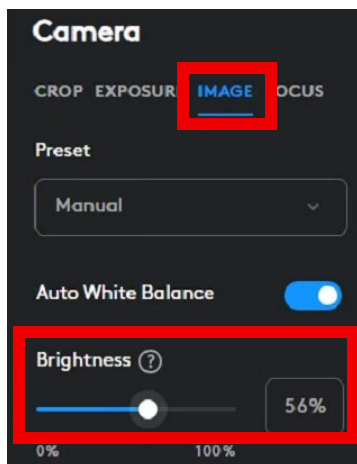

- Set the Zoom (note: at 1280x720, the zoom is limited to 180%. If you need to Zoom in more, set the resolution to “640x360 – 30FPS” in Step 3)

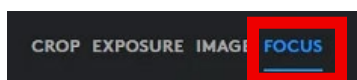

- Set the position of the camera, using the arrows to move the camera's position

- Adjust the brightness by going to **Image** and the adjusting the **Brightness**

- Adjust the **Focus** as necessary

- Close out of the camera software
