

user tips & tricks:
learning with [lynda.com](https://www.lynda.com)

Laurie Burruss is. . .

- **ALWAYS:** A storyteller, recently a digital storyteller
- **NOW:** Sr. Director of Education at lynda.com Online Training Library©
<http://www.lynda.com> laurie@lynda.com
- **THEN:** 19 years @Professor in Design at Pasadena City College teaching Interactive Multimedia Design
- **AND ALSO:** 11 years as Director of the Pasadena City College Center serving the state of California as a regional resource for collaboration between education, industry, and the community.

Pre-K 4 yrs old

1

Access & Login

Individual

Enterprise

The screenshot shows the Lynda.com login interface. At the top, there are navigation links: "Become a member", "products", "new releases", "support", "subscribe", "reactivate", and "log in". Below this is a search bar with the placeholder text "What would you like to learn?". The main content area is divided into two sections: "Log in" and "Log in through your organization or school". The "Log in" section has fields for "user name" and "password", a "stay logged in" checkbox, a "log in" button, and a "Forgot login?" link. The "Log in through your organization or school" section has a field for the organization's URL, a "go" button, and a "Not sure how to log in?" link. A red arrow points from the word "Individual" to the "Log in" section, and another red arrow points from the word "Enterprise" to the "Log in through your organization or school" section. The background shows a list of video courses, including "Creating a Responsive Web Design", "Documentary Editing with Final Cut Pro X", and "Aperture 3 Essential Training (2012)".

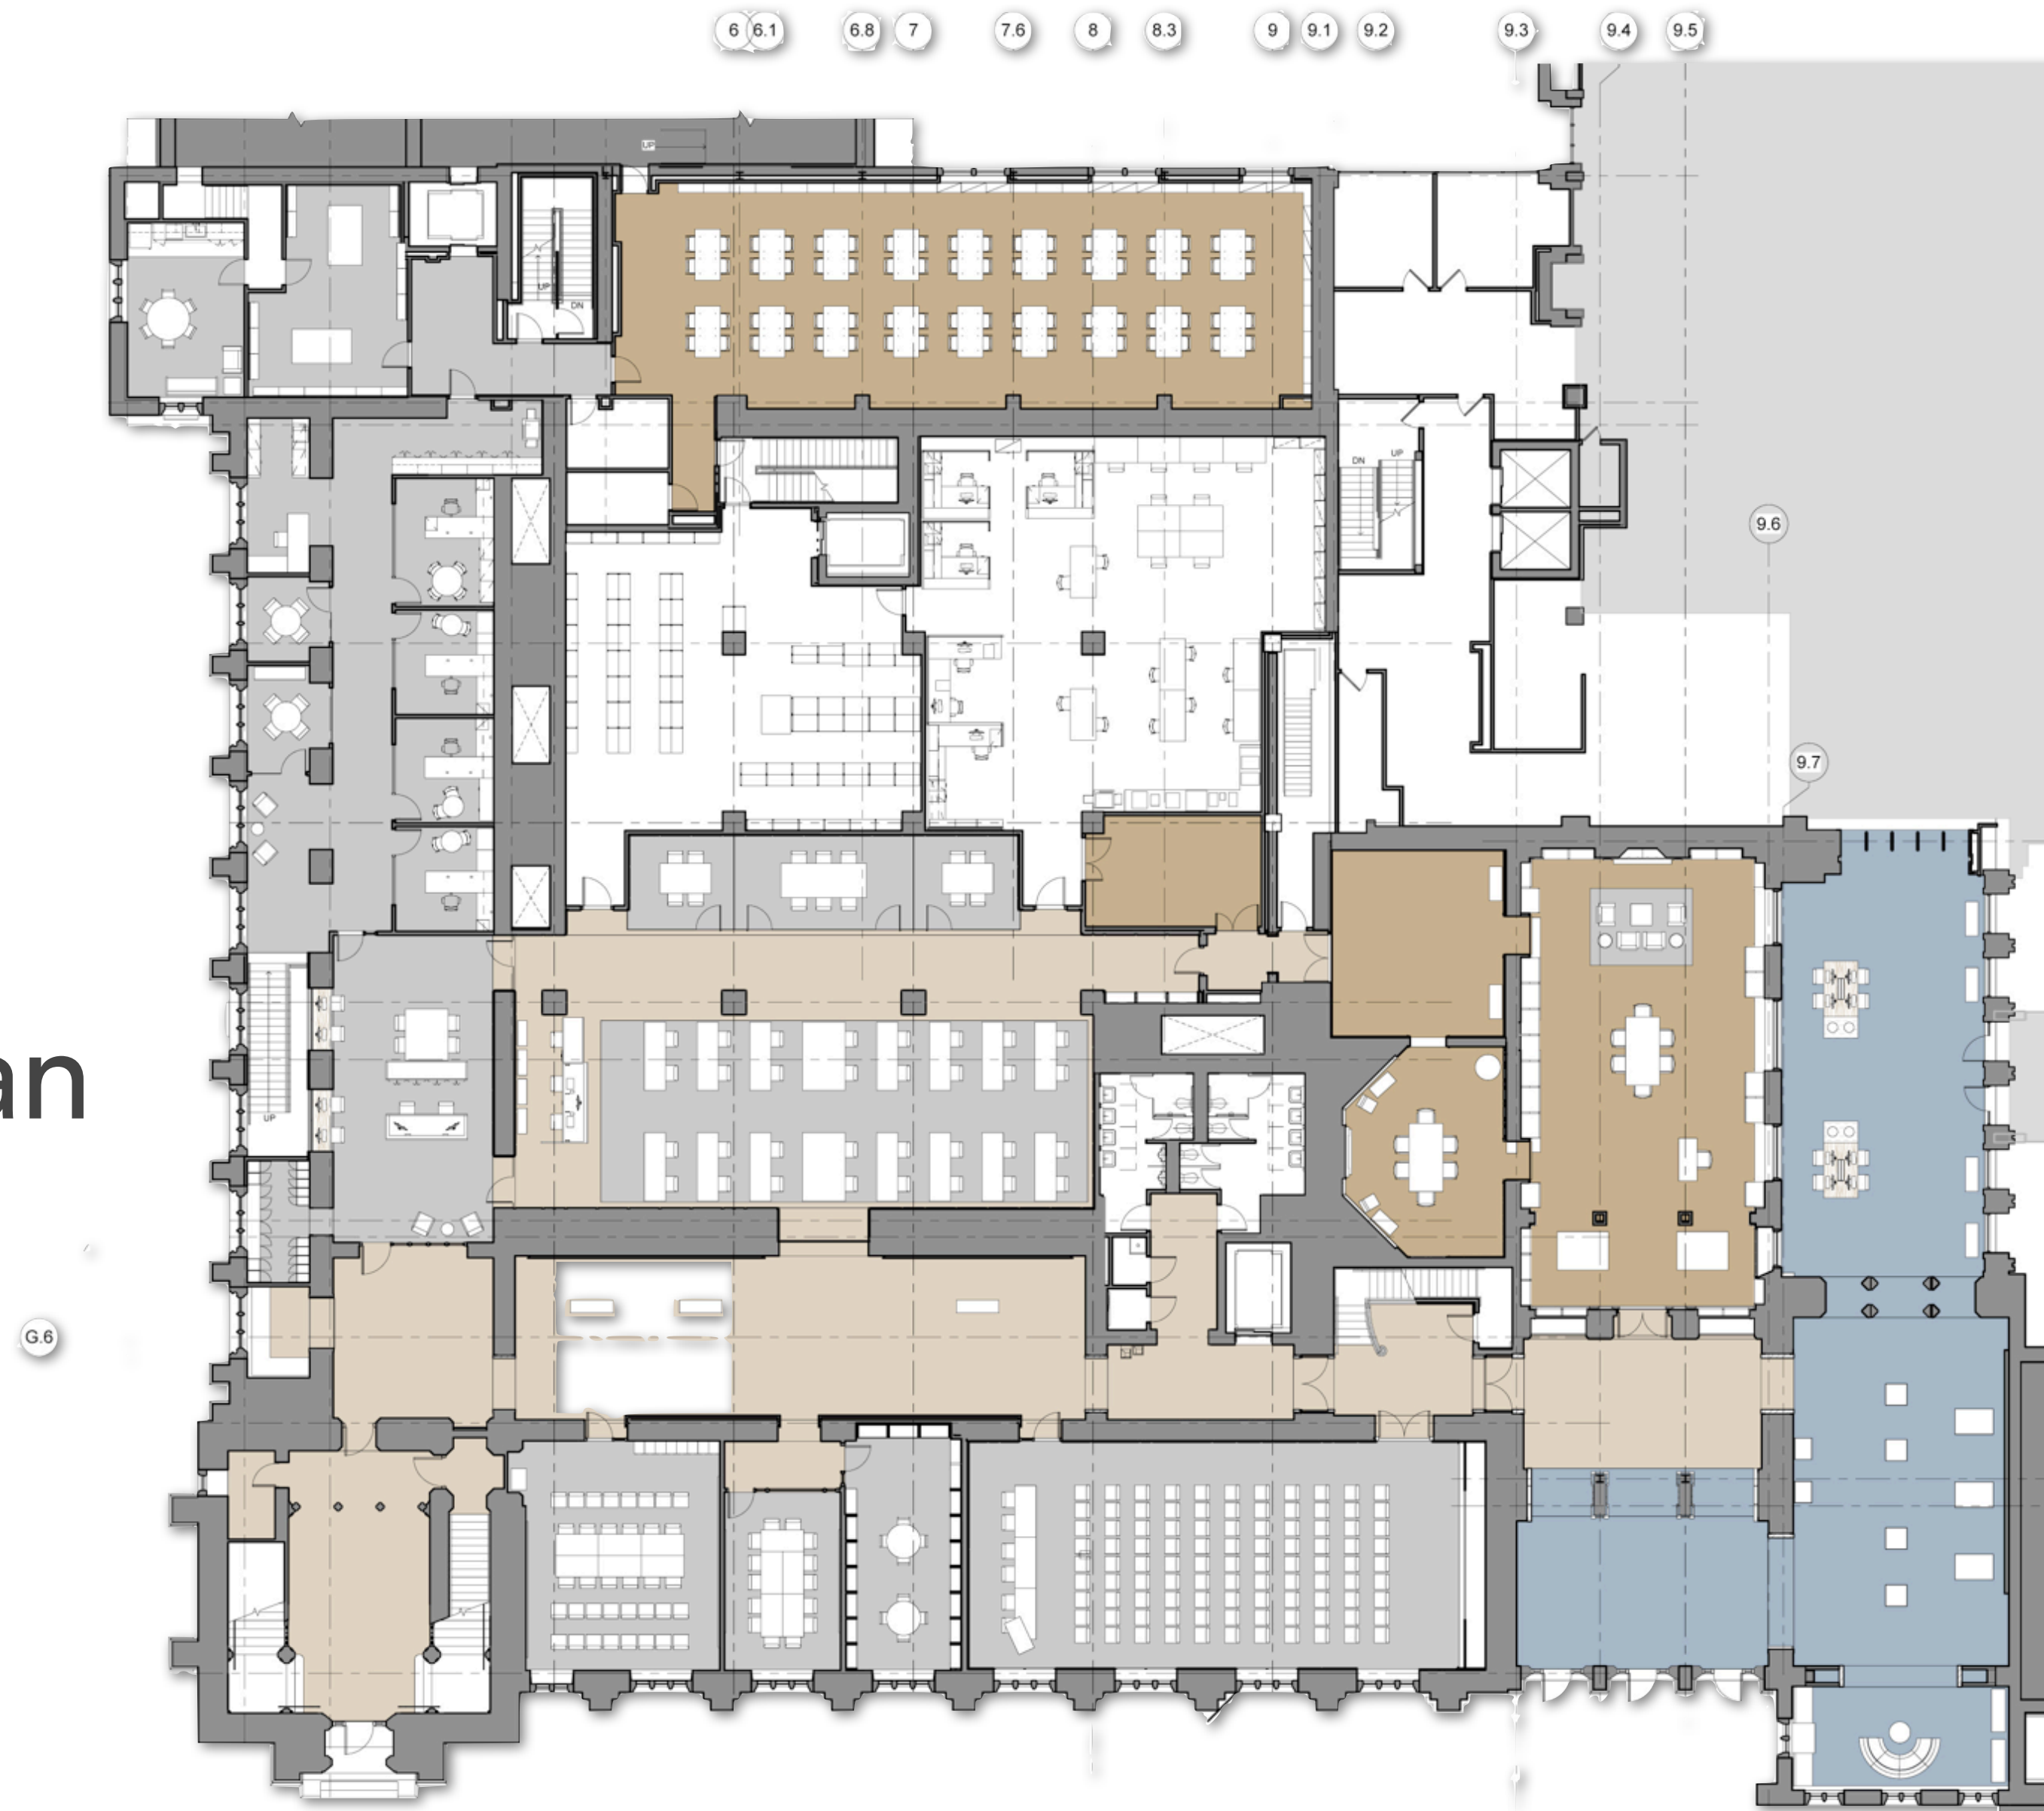

Lynda.com login page showing two options:

- Log in** (Individual): Requires user name and password. Includes a "stay logged in" checkbox and a "log in" button.
- Log in through your organization or school** (Enterprise): Requires the organization's URL. Includes a "go" button and a "Not sure how to log in?" link.

Both options include a "Forgot login?" link and a "Not a member?" link.

Methodology & Pedagogy

- Tools
- Expert topic
- Project-based
- Principles
- Documentaries

Content is Queen.

lynda.com

Meaning, Quality, Value, Curation

"The power of the moving image in communicating complex information to students."

SENSORY DESIGN:

- Association
- Interpretation
- Integration
- Elaboration
- Engagement

All to make the senses work together!

BEST PRACTICES:

- ➔ The BIG IDEA followed by granular details
- ➔ Information presented by a subject matter expert
- ➔ Context offered
- ➔ Meaning with "real world" experiences
- ➔ Timing, tempo, chunks of learning
- ➔ Animation with narration
- ➔ Repetition of the concept "exposure" in many different ways
- ➔ *Design elearning for more . . .*

feedback

Search this course

submit

This course shows how to establish a web presence quickly and easily with WordPress.com, without having to download any software or set up web hosting. Morten Rand-Hendriksen shows how to sign up for an account, personalize your profile, and start posting content right away. The course also includes tutorials on everything from adding images, video, formatting, and links that make blog posts pop to installing plug-ins, creating custom themes, and attracting readers with social sharing, and more.

▼ Introduction

Welcome

▼ 1. Getting to Know WordPress

Using your own asset files

What is WordPress?

Understanding the difference between cloud hosting and self-hosting

▼ 2. Getting Started with WordPress.com

Setting up an account

Setting up a new blog or web site

Navigating the WordPress.com back end

The WordPress.com toolbar

▼ 3. Building a Profile

Editing your profile

Creating profile images with Gravatar

Modifying personal settings

Adjusting site settings and improving privacy and findability

Exploring advanced sharing options

Adding sharing buttons to posts and pages

▼ 4. Creating Posts

Understanding the difference between posts and pages

Creating a new post

Advanced text formatting in a new post

+ expand all | - collapse all

Introduction

- Previewing the project across browsers
- Using the exercise files

1. Creating Project Folders

- Creating and linking HTML and CSS

2. Preparing Web Graphics

- Using the Slice tool in Photoshop
- Adding appearances and slices in Illustrator
- Using Smart Objects in Photoshop
- Creating navigation states with Photoshop

3. Creating a Layout in HTML and CSS

- Creating the HTML for the container
- Adding in sample content for layout
- Adding CSS rules for the container
- Adding CSS rules for captions
- Adding CSS rules for navigation

4. Dynamically Generating Marquee

- Separating data from the container
- Adding jQuery, the preload plugin

Step 02: ONLINE VIDEO

- QT Custom Player
- closed captioning ON
- 2X speed
- auto-play chapter ON

Create an Interactive Homepage Marquee with jQuery
