

Preparing Students To Be Scholarly for a Lifetime

**Speaker: Margaret Evans Gayle, Visiting Research Fellow,
The Research Network and Executive Director, The American
Association for Gifted Children, Duke University**

**What: Advocacy Forum and Dinner for Parents and
Educators**

When: Thursday, November 15, 2012 - 5:45 p.m.

**Where: Erwin Mill Building – 2024 West Main Street,
Durham, NC**

Bay A, 103 - Event Room

Essential Question: How will this generation of children grow up with the necessary knowledge and wisdom as defined by the new 21st century taxonomies, to address issues, problems and challenges when solutions are complex and not easily definable and accessible?

The forum will provide a discussion on emerging education issues and trends that will impact Learning, Curriculum and Intelligent Behaviors needed for students to be successful in school, life and work. A resource bibliography and sample materials from Bright IDEA training will be provided.

The presentation will do a special focus on state and national standards for all students and how curriculum will be delivered with the new common core standards and emphasis on STEM education, grades K-12.

Mrs. Gayle will provide a sample set of STEM standards, concepts and curriculum options for challenging students to be scholarly.
