

# Energy Informational Tool

...

Vincent Baker, Josh Fairman, Tommy Livesay, Brooke Sanders,  
Thuan Tran

# Energy Informational Tool

is an online platform that compiles and displays energy usage data from Duke buildings.

# Problem

- Data Accessibility

- Energy waste via doors

# Motivations

## Energy Informational Tool

- Transparency of macro-scale energy usage
- Unified platform

## Engineering

- Demonstrate micro-scale modular applications

# Available Data

- Historic electricity and steam use
  - 10 years, monthly
- Current steam, hot water, and chilled water use
  - 15-minute intervals, updated daily
  - Going back 9 months

## Raw Data

Building	Timestamp	Consumption (ft <sup>3</sup> )
Gilbert-Addams	9/8/22 4:00	34.2
Gilbert-Addams	9/8/22 4:15	35.8
Gilbert-Addams	9/8/22 4:30	28.04
Gilbert-Addams	9/8/22 4:45	37.03
Gilbert-Addams	9/8/22 5:00	28.3
Gilbert-Addams	9/8/22 5:15	38.32
Gilbert-Addams	9/8/22 5:30	44.84
Gilbert-Addams	9/8/22 5:45	43.98

# Our Steam Model

- Purchased historical weather data for Durham, NC
- Merged it with our building steam consumption data
- Used RStudio to create linear regression model identifying predictors of relevance
  - Temperature, UV, and Apparent

## Regression

```
Call
lm(formula = consumption ~ temperature + feels_like + uv, data = ga_data)

Residuals:
    Min       1Q   Median       3Q      Max
-629.08 -162.37   -7.12  157.76  673.38

Coefficients:
              Estimate Std. Error t value Pr(>|t|)
(Intercept)  1395.901    17.234   80.997 < 2e-16 ***
temperature  -31.176     1.671  -18.660 < 2e-16 ***
feels_like    10.128     1.443    7.017 2.39e-12 ***
uv             41.182     1.316   31.298 < 2e-16 ***
---
Signif. codes:  0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1

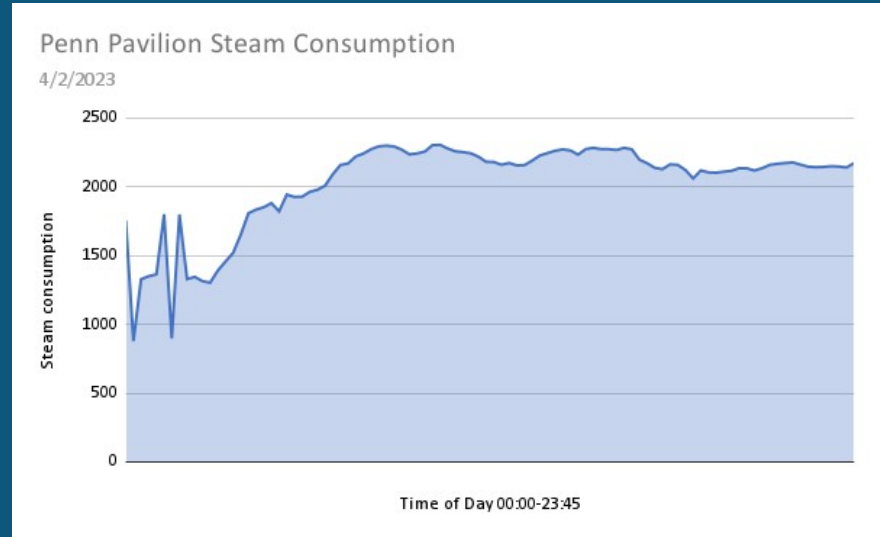

Residual standard error: 221.8 on 12356 degrees of freedom
(3090 observations deleted due to missingness)
Multiple R-squared:  0.4207,    Adjusted R-squared:  0.4206
F-statistic: 2991 on 3 and 12356 DF,  p-value: < 2.2e-16
```

# Our Steam Model cont.

- Created web scraping script for weather forecasts
- Predicted steam consumption with historical and weather data
- Use case for information tool platform

Mon 01	69°/46°	 Partly Cloudy	7%	WSW 13 mph	▼
Tue 02	70°/49°	 Partly Cloudy	18%	WSW 12 mph	▼
Wed 03	72°/50°	 Mostly Sunny	12%	W 10 mph	▼

weather.com

# Website

## Goals:

- Clear and direct displaying of multiple data inputs
- Fidelity and utilization akin to Princeton's Energy Usage Website

## Improvements:

- Improve UI/UX for easier future integration

# Website

## Energy Information Tool

We divided our data and models into building types. Click on one of the buttons to see energy usage data for each building group.

# Budget & Materials

Item	Quantity	Cost per unit (\$US)
Platinum RTD Sensor - PT100	6	16.50
PT100 RTD Temperature Sensor Amplifier - MAX31865	6	14.95
FS3000-1015 Air Velocity Sensor Breakout	3	59.95
Flexible Qwiic Cable - Breadboard Jumper	3	1.60
Micro SD Card Breakout	3	7.50
Micro SD Card	3	6.00
Arduino Uno	3	28.50

Item	Quantity	Cost per unit (\$US)
Proto/Breadboard	3	6.75
1" 80/20 Aluminum Extrusions	7 ft	2.76
9V Battery	3	2.62
Barrel Jack	3	3.50
Wifi Module (ESP8266)	3	7.50
80/20 1/4-20 x 0.5" Button Head Socket Cap Screw with Steel Slide-in T-Nut	25	0.68
80/20 Aluminum 2 Hole Inside Corner Bracket	10	4.41
<b>Total</b>		<b>631.82</b>

# Final Progress - Live Data

## Goals:

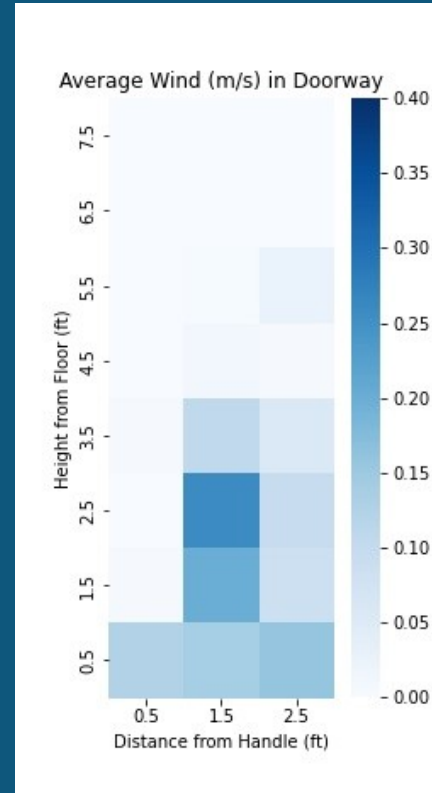

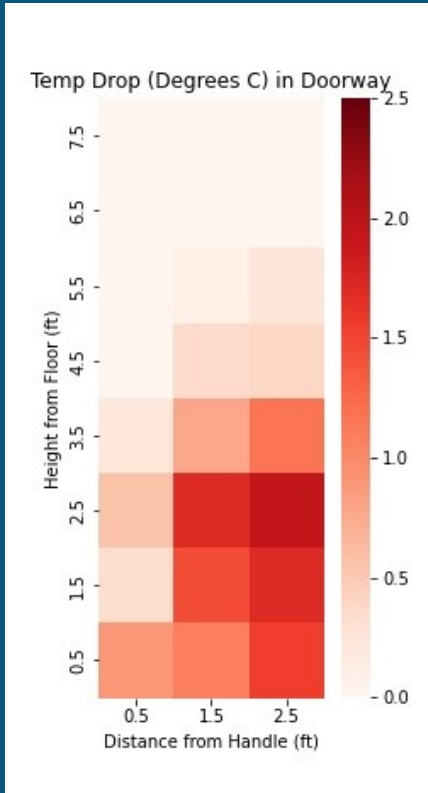

- Understand energy loss
  - Numerical model
- Demonstrate future compatibility for the website

## Improvements:

- Increase model robustness
- Better real-time integration with website

# Data Collected

# Final Progress - Live Data

Duke  
UNIVERSITY

BASS  
CONNECTIONS

# Benefits

## Social

- Student groups can access energy data
- Important for policy-making
- Increases awareness of steam usage and heating patterns in student body

## Environmental

- Promotes more conscientious energy-use in the student body
- Wasted energy from doors = 7 Watt hrs for 20 seconds open

## Market

- Helps Duke save money and energy
- Proposed solutions will integrate efficiency with accessibility

# Promotion

- Reached out to Duke Environmental Union
  - In addition to energy/environment- oriented **student groups** to get our tool publicized
- Talked to DSG member → **Green Devils** to carry on the work potentially
  - Paid student interns
  - Managed by Sustainable Duke
- **Future:** Contacting energy usage website teams at other campuses to

Duke  
UNIVERSITY

BASS  
CONNECTIONS

# Results

## Informational Tool Platform

- Accessible, presentable website
- Displayed energy use information for different building types at Duke
- Promoted to student body and student groups that work with energy and the environment

## Engineering Data Collection

- Constructed a numerical model based on experimental data
- Integrated real-time data with the website tool
- Used collected data to inform campus decisions

Thank  
You!
