

Sebastian J. Bae

Introduction to National Security Wargaming

The lecture will introduce students to professional wargaming in the national security field. From ancient to modern wargames, the lecture will briefly discuss the history and evolution of wargaming as a discipline. The focus of the lecture will examine the purposes, the taxonomy, and strengths and weaknesses of both analytical and educational wargames in the national security field.

Sebastian J. Bae is an adjunct assistant professor at the Center for Security Studies at Georgetown University. He teaches a graduate course, Basics of Wargaming, where student teams research and design educational wargames on military case studies. His professional research focuses on wargaming, emerging technologies, future warfighting concepts, and strategy and doctrine for the U.S. Army and Marine Corps.

Tuesday, Oct. 27, 10:15-11:30AM (Zoom)
