End-to-End Processes

- Streamlined Procure to Pay
- Accelerated Plan to Product
- Optimized Order to Cash

- Procurement
- Inventory Management
- Production Planning and Execution
- Availability to Promise
- Product Lifecycle Management
- Enterprise Project and Portfolio Management
- Maintenance Management
- Quality Management
- Order and Contract Management
- Billing and Invoicing
- Marketing
- Environment, Health, and Safety
### SAP S/4HANA, on-premise edition

#### Procurement

<table>
<thead>
<tr>
<th>Solution today</th>
<th>Planned innovations</th>
<th>Future direction</th>
</tr>
</thead>
<tbody>
<tr>
<td>• Self-Service Requisitioning process with cross content and product search</td>
<td>• Simplified service procurement process including service entry sheet processing</td>
<td>• Semantic multi-backend process capabilities. Procurement shared service center via SAP S/4HANA</td>
</tr>
<tr>
<td>• SAP Fiori Apps for processing of purchase requisitions, purchase orders, contracts, info records, supplier invoices and managing sources of supply</td>
<td>• Integration with SAP Ariba Collaborative Planning &amp; Sourcing</td>
<td>• Enablement of industry specific procurement functionality within SAP Fiori Apps</td>
</tr>
<tr>
<td>• Purchase Order and invoice collaboration with out of the box integration into SAP Ariba business network</td>
<td>• Comprehensive Procure-to-Pay support with central SAP Fiori-based overview page for all buyers</td>
<td>• Complete end-to-end business processes via SAP Fiori Apps</td>
</tr>
<tr>
<td>• Smart business KPI Apps to analyze in real-time purchase order value and delivery time, supplier evaluation scores, off-contract spend and contract validity</td>
<td>• Enhanced SAP Fiori UI’s for Purchase Requisition, Purchase Order and Contract processing</td>
<td>• Enablement of SAP S/4HANA as Central Contract Management hub</td>
</tr>
<tr>
<td>• Search and contextual navigation for purchase orders, purchase requisitions and info records</td>
<td>• SAP Fiori Apps for managing of scheduling agreements, quota arrangements and source lists</td>
<td>• Contract Distribution to ERP and SAP S/4HANA backend systems</td>
</tr>
<tr>
<td>• Supplier Evaluation using flexible Questionnaires, Scoring and Weighting enabled</td>
<td>• Search and contextual navigation for scheduling agreements</td>
<td>• Support of Network enabled Sell Side Processes</td>
</tr>
<tr>
<td>• Enablement of Category Management</td>
<td>• Integration of purchasing categories into operational processes</td>
<td></td>
</tr>
</tbody>
</table>
SAP S/4HANA, on-premise edition

Inventory management

- Real-time inventory management through redesigned data model in SAP S/4HANA
- Simplified material valuation to enable parallel inventory posting for standard price-driven materials
- SAP Fiori apps for inventory managers
- SAP Fiori apps for warehouse clerks

- Enhancement of SAP Fiori apps for inventory managers and warehouse clerks in SAP S/4HANA
- New SAP Fiori apps for inventory managers
- Inventory management with SAP S/4HANA – performance optimization for goods movements
- Enhancement of object page

- Simplified material valuation to enable parallel inventory posting for moving average price-driven materials
- New SAP Fiori apps for inventory managers, warehouse clerks, and inventory analysts in SAP S/4HANA
- Catch weight management integration into the core

Solution today

Planned innovations

Future direction
SAP S/4HANA, on-premise edition
Production planning and production execution

- SAP Fiori apps for material requirements planning (MRP cockpit)
  - Managing and monitoring external and internal requirements
  - Managing and monitoring material coverage
  - Monitoring production or process orders
  - Change requests
- Accelerated material requirements planning (MRP run) in SAP S/4HANA
- Further production planning and material requirements planning adoption for SAP S/4HANA, such as the replacement of the logistics information system

- Integrated production planning and detailed scheduling in SAP S/4HANA
  - Advanced planning and optimization and production planning and detailed scheduling
  - Live cache-based, finite-capacity planning as an integral part of the SAP HANA platform, requiring just one database to manage
  - Advanced analytics
  - One MRP system
  - Simplified data integration
  - Intuitive maintenance of master data and integration models

- New graphical planning board for production planning and detailed scheduling
- Shop-floor cockpit (new SAP Fiori apps for production supervisors)
- Visual manufacturing planner
- Visual asset management
SAP S/4HANA, on-premise edition
Advanced available to promise (ATP)

- Mass product availability check enabled by SAP HANA for sales, planned, and production orders.
  - Advanced available to promise (ATP) check for all items of an order at once
  - Significant performance improvements for releasing large production orders

- SAP Fiori app for delivery managers
  - Deciding which sales orders should be part of the next delivery wave ("release for delivery")

- Back-order processing
  - Improved flexibility in back-order processing
  - Simplified setup thanks to parameters aligned with business requirements

- Sales product allocation
  - Product allocation check for sales rules, such as fair share, ranked, or prioritized share
  - Simplified product allocation data maintenance (SAP Fiori)
**SAP S/4HANA, on-premise edition**

**Product lifecycle management**

- Production version based on bill-of-material (BOM) data
- Document management system (DMS) integration with mobile documents
- Attachment Service

- Upload Download without ACF in Webdynpro
- SAP Fiori apps for BOM engineers
- SAP Fiori apps for recipe developers
- Simplified DMS – HTML5-based document upload and download
- Enhancements for product structure management – integrated BOM into product structure management

- BOM simplification (SAP Fiori)
- Integrated BOM and routing (SAP Fiori)
- Simplified classification (SAP Fiori)
- Simplified document management (SAP Fiori)
- New process – handling embedded software and systems engineering
- CAD integration with the SAP Engineering Control Center integration tool
- New roles supported for development manager
- Enhancements for recipe developer (recipe finder, change simulation)
- Target-driven recipe development and product compliance check with integration to cloud-based content platforms (SAP Fiori)
- Enhanced recipe analytics (SAP Fiori)

---

**Solution today**

**Planned innovations**

**Future direction**
SAP S/4HANA, on-premise edition
Enterprise portfolio and project management

- SAP Fiori apps for project financial controllers and project logistics controllers
- SAP Enterprise Project Connection* for SAP S/4HANA
- Object pages and list reports – SAP Fiori apps for the display of project system object master data
- SAP Fiori apps for WBS creation and editing
- Additional analytical and transactional SAP Fiori apps for project financial controller
- SAP S/4HANA Portfolio and Project Management * ** for simplified management of projects and project portfolios

Solution today

Planned innovations

Future direction

* Refers to add-on products; ** final name TBD
SAP S/4HANA, on-premise edition

Maintenance management

<table>

SAP S/4HANA, on-premise edition
Quality management

- Core quality management processes supported by SAP software
  - Quality engineering
  - Quality inspection
  - Quality improvement
- New SAP Fiori launchpad for quality technicians
- SAP Fiori app for quality technicians
- Option to search for important quality-related objects
- Object pages for a wide range of quality objects
- New work lists for important quality-related objects such as inspection lots and so on
- New SAP Fiori launchpad for the following roles:
  - Quality manager, quality engineer, quality planner, quality auditor, calibration technician
- Additional object pages for a wide range of quality objects
- Additional work lists for important quality-related objects
- Core data services (CDS) views replacing quality management information system
- Simplified test-equipment management

Solution today | Planned innovations | Future direction
### SAP S/4HANA, on-premise edition

#### Order and contract management (sales and distribution)

<table>
<thead>
<tr>
<th>Solution today</th>
<th>Planned innovations</th>
<th>Future direction</th>
</tr>
</thead>
</table>
| - Service-provider contract management using SAP Customer Relationship Management (SAP CRM) side by side | - Further enhancements to SAP Fiori UX for main sales user roles  
  - Internal sales representative  
  - Claims, returns, and refunds clerk  
  - Sales manager | - Order and Contract Management  
- Optimized Order to Cash |
| - Order management for solution bundles using SAP CRM side by side | - CDS-based analytics replacing sales information system in SAP ERP and SAP HANA Live offerings | |
**SAP S/4HANA, on-premise edition**

**Billing and invoicing (sales and distribution)**

- SAP Fiori apps for billing clerks (sales and distribution)
  - Scheduling the output of billing documents
  - Running the output of billing documents in the background
- SAP hybris Billing and contract accounts receivable and payable (FI-CA)
- SAP Fiori apps for invoicing managers (SAP hybris Billing)
- Viewing unbilled revenue
- SAP Fiori apps for accounts payable and receivable managers
  - Planned real-time consolidations and visibility into focus areas for KPIs from contract accounts receivable and payable – payment locks, dunning locks, clearing locks, posting locks, statistics on open clarification lists
- SAP Fiori apps for customer operators (SAP hybris Billing)
  - Correction of invoicing information in SAP hybris Billing, such as correction of invoiced amount or tax amount
- SAP Fiori UX for billing clerks (sales and distribution)
  - Additional role-specific user interfaces with simplified user experience – pricing, design, monitoring (SAP hybris Billing)

---

**Solution today**

**Planned innovations**

**Future direction**
SAP S/4HANA, on-premise edition
Environment, health, and safety (EHS)

- Incident management
- Health and safety management
- Product safety, dangerous goods, global label management (compatibility packs)*
- Product compliance, discrete industries (compatibility packs)

- EHS launchpad
- Incident management analytics
- Incident on any device app
- Lean risk-assessment process
- Risk and control survey
- Integration of dangerous goods with SAP Extended Warehouse Management

- Environment management
- Simplification of incident management, risk assessment, and management of change processes
- Integrated sustainability reporting with SAP S/4HANA Finance
- Global label management with manufacturing
- Integration of dangerous goods with SAP Transportation Management
- Integrated product safety with materials management and operations functionality in SAP S/4HANA
- Integrated product compliance with SAP Product Lifecycle Management

* Usage of compatibility packs for SAP S/4HANA is individually regulated by contract.

SAP S/4HANA, on-premise edition
Treasury and financial risk management

- SAP Cash Management: cash management, liquidity management, bank account management
- SAP Treasury and Risk Management application: IFRS 9 first parts
- SAP Fiori for cash managers for cash position, cash flow, bank account management, and liquidity management
- One exposure: central storage of all actual and forecast operational transactions, the single source of truth for all fin risks from operations
- Trade Finance: Integration of the most important global trade payment method, Letter of Credit, in Treasury as a product category

- Further enhancements to SAP Cash Management: cash mgmt, bank account mgmt, liquidity planning, centralized and decentralized BAM
- Treasury in SAP S/4HANA: “One Exposure” and consumer apps enhancements, FX risk management, hedge accounting according to IFRS 9*
- Further SAP Fiori coverage: continuous apps delivery for treasury, treasury and cash reporting
- Trade Finance: continuous enhancements*: bank guarantee and stand-by letter of credit, integration with different SAP components

- Renewal of SAP Fiori apps for treasurers covering entire scope of essential processes in treasury and financial risk management.
- Advanced capabilities to support predictive liquidity forecast
- Further enhancements in Trade Finance facilitating utilization of cash, credit, investments, and other assets for trade
- Further improvements of bank relationship management including bank fee analysis
- Further enhancements in FX Risk Management streamlining hedge management processes and supporting IFRS9 Hedge Accounting

**SAP S/4HANA**, on-premise edition

**Finance operations**

- **SAP Real Estate Broker mobile app** – search property listings to access accurate real-time property data and connect customers with
- **SAP Fiori apps for collections, dispute, and receivables management** – process collections worklists and receivables, manage dispute cases
- **SAP Fiori apps for account payables management** – supplier payment analysis, overdue payables, DPO, cash discount utilization, future payables, etc.
- **SAP S/4HANA Finance, central finance foundation** – replication of payment and clearing (pilot shipment)
- **Simplified set-up of SAP Credit Management in SAP S/4HANA** in a single system landscape
- **Additional SAP Fiori apps for receivables management** – lockbox apps for reprocessing incoming checks
- **Additional SAP Fiori apps for payables management**, for example, down payment request
- **SAP HANA Cloud Platform Apps for Finance Operations** – customer payment management, integration of credit bureau with SAP Credit Mgmt
- **SAP S/4HANA Finance, central finance process** – foundation for central payment enablement (pilot shipment)
- **Seamless SAP Ariba integration into SAP S/4HANA** without the need to install the SAP Ariba Add-On
- **Completion of SAP Fiori renewal for finance operations roles**, including SAP Fiori apps for SAP SuccessFactors (e.g., service requester and apps for back office)
- **Further SAP Ariba network capabilities** – for example, e-invoicing, supplier portal, and complete E2E integration between buyer and supplier
- **Integration with SAP AribaPay solution** enabling smooth payment processes
- **Innovations in supply chain finance**, including support for factoring and reverse factoring (via the SAP Ariba network)
- **Enhanced integration with Concur solutions** for enhanced transferability of cost objects and account data delivered with supplier invoices

*part of other shipments*
**SAP S/4HANA, on-premise edition**

Core Human Resources
SAP S/4HANA, on-premise edition
Core human resources (HR)

- Employee integration for SAP S/4HANA, on-premise edition – CDS views of the employee and employment data provided to support the HR employee data model for the on-premise edition

- Employee integration – calendar-based timesheet for multiple accounting objects for SAP S/4HANA, with access and integration for contingent workers

- Timesheet
  - New flexible calendar-based timesheet for all accounting objects, including embedded KPIs
  - Approval of times for managers and project leads in SAP Fiori inbox

- Employee integration
  - Enablement of a skill-based search on employees from SAP SuccessFactors Employee Central – for example, staffing in SAP S/4HANA
  - Managing generated personnel-number keys in subsystems within SAP SuccessFactors Employee Central to safeguard stable personnel numbers across multiple systems
  - Total workforce integration for SAP S/4HANA with SAP Fieldglass software, SAP SuccessFactors Employee Central, SAP ERP Human Capital Management (SAP ERP HCM), and Ariba solutions to integrate a contingent workforce

- Contingent workforce integration through SAP ERP HCM, including supplier assignment and purchase order assignment

- Support for the existing cloud-based contingent workforce integration in SAP SuccessFactors Employee Central and for SAP S/4HANA, on-premise edition
SAP S/4HANA, on-premise edition
Integration of supply chain products

- SAP Advanced Planning and Optimization (including global ATP functionality), SAP Supply Network Collaboration, and SAP Service Parts Planning connected side by side to SAP S/4HANA
- SAP Integrated Business Planning connected to SAP S/4HANA through SAP HANA Cloud Integration technology
- SAP Extended Warehouse Management connected side by side to SAP S/4HANA
- SAP Transportation Management connected side by side to SAP S/4HANA

Integration with further processes in SAP Integrated Business Planning (cloud):
- Advanced demand-planning capabilities
- Order-based supply planning
- Enhanced response management
- Segmentation optimization
- Industry-specific processes
- Collaborative business network planning

SAP Extended Warehouse Management as an integral part of SAP S/4HANA (replacing warehouse management functionality) with:
- Full industry support in SAP S/4HANA
- Planning enhancements for retail and e-commerce
- Integration with load optimization
**SAP S/4HANA, on-premise edition**

Integration with SAP CRM and SAP Cloud for Customer

- Full SAP CRM backward compatibility and industry support with side-by-side deployment of SAP S/4HANA
- Visual harmonization through Web UI with SAP Fiori for SAP CRM
- SAP Cloud for Customer integration with the on-premise and cloud editions of SAP S/4HANA
  - Bidirectional integration of business partners
  - Material replication from SAP S/4HANA to SAP Cloud for Customer
  - Creating an SAP S/4HANA sales order out of an SAP Cloud for Customer opportunity

- SAP Cloud for Customer integration with SAP S/4HANA, on-premise edition
  - Full scope (same as SAP ERP integration)

- SAP Cloud for Customer integration with SAP S/4HANA, cloud edition
  - Enhancements to sales integration scenario

- Customer engagement center (SAP hybris) for SAP S/4HANA

---

# SAP S/4HANA, on-premise edition

## Cross-topics

<table>
<thead>
<tr>
<th>Identity and access management (cloud only)</th>
<th>Fully qualified business catalog roles are assigned by key user using an SAP Fiori app to business user. Assigned SAP Fiori catalogs are exposed and ready to be used.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Job scheduling and monitoring</td>
<td>Technical jobs are scheduled automatically based on available metadata. Business jobs (such as a billing run) can be scheduled and monitored in the SAP Fiori UX.</td>
</tr>
<tr>
<td>Search and object browser</td>
<td>All relevant business entities are enabled for easy search. Object browsers are established as the standard view for these business entities and allow actions and further navigation.</td>
</tr>
<tr>
<td>Attachments services</td>
<td>New attachments service with specialized cloud persistence introduced (configurable). Document data is stored in SAP Mobile Documents infrastructure, which is integrated to the knowledge provider feature.</td>
</tr>
</tbody>
</table>

### Solution today

- Group business-catalog roles to business roles – Business roles based on job catalog information are assigned automatically. Customer can use restriction types in roles for flexible authorization (display only, department views, and so on).
- Support job chains to reflect job dependencies. Extended job monitoring and job result views.
- Extended capabilities of object browser towards coverage and quick actions.
- Extend business coverage of new output management. Extend support output channels. Apply branding capabilities.
- Extend business coverage of new attachments service. Enable attachments service for document viewing on mobile devices.

---

**Disclaimer:** This roadmap represents SAP's current plan, but is subject to change without any prior notification. Certain planning constraints, such as regulatory and licensing issues, are outside of our control and may impact the timelines. © 2016 SAP SE or an SAP affiliate company. All rights reserved.
SAP S/4HANA, on-premise edition
Cross-topics – analytics

On-premise edition and cloud edition

**IT user**
- Maintaining CDS views in the ABAP programming language for Eclipse

**Analytics key user**
- Creating new KPI tiles using existing KPIs
- Creating query views

**Analytics end user**
- Query browser
- Multidimensional reporting
- KPIs, SAP Smart Business cockpits
- Specific analytical apps (customer engagement intelligence, finance)
- Analysis for Microsoft Office (on premise only)
- SAP Lumira (acquisition mode, on premise)

**Business content**
- About 4,600 open CDS views
- Reports – finance, sales and distribution, commercial project management
- KPIs – areas above as well as material management and production planning

---

On-premise edition and cloud edition

**IT user**
- Creating and extending CDS views

**Analytics key user**
- Managing report assignments
- Creating new KPIs

**Analytics end user**
- Overview pages
- UI-embedded analytics
- Analysis path framework

**Business content**
- Further views, KPIs, reports to cover SAP S/4HANA scope

---

On-premise edition and cloud edition

**IT user**
- Creating planning functions

**Analytics key user**
- Defining planning models

**Analytics end user**
- Excel integration
- KPI and report gallery

**Business content**
- Further views, KPIs, reports to cover SAP S/4HANA scope

---

**Solution today**

**Planned innovations**

**Future direction**
SAP S/4HANA, on-premise edition
Cross-topics – extensibility

Side-by-side extensibility using SAP HANA Cloud Platform
- Limitations – only technical user, for example
- See SAP HANA Cloud Platform road map

In-app extensibility for key users through built-in capabilities
- Field extensibility (custom fields)
- UI flexibility (hide, move, and add fields; change labels) for smart controls
- Report extensibility (new reports)
- Business logic extensibility (code breakouts)
- Forms extensibility (printing forms and e-mail templates)

Side-by-side extensibility using SAP HANA Cloud Platform
- With end-to-end processes of identity management and single sign-on

In-app extensibility for key users through built-in capabilities
- UI flexibility for non-smart controls
- Table extensibility – custom tables for cloud marketing edition

Side-by-side extensibility with custom Open Data Protocol (OData) services
- Enabling customers and partners to easily create new OData services from CDS views in SAP Web IDE (integrated development environment) with lifecycle management in SAP HANA Cloud Platform
- In-app extensibility for key users through built-in capabilities
- Table extensibility – custom tables, custom objects, custom child tables to SAP software objects
- Custom CDS views

Solution today

Future direction
Industry enablement
All 25 Industries released for SAP S/4HANA with SAP S/4HANA Finance¹)

Industries
- Chemicals
- High-Tech
- Higher Education & Research
- Industrial Machinery & Components
- Insurance
- Life Sciences
- Mining
- Professional Services
- Sports & Entertainment
- Telco
- Travel & Transportation
- Wholesale

Industries released with major coverage²)
- Aerospace & Defense
- Automotive
- Banking
- Consumer Products
- Defense & Security
- Engineering, Construction & Operations
- Mill Products
- Public Sector
- Utilities

Release of additional industry scenarios including Oil & Gas

First simplified industry Solutions e.g. Healthcare, Retail, Fashion Public Sector

Release of additional industry scenarios including Media

1) For restrictions related to S/4HANA Finance 1503, see SAP Note 2119198
2) Limitations related to selected industry specific scenarios like CWM and DSD. See SAP Note 2214213 for details.
3) As of S/4HANA SP01 (released on February 3rd 2016)

Please see http://global12.sap.com/corporate-en/legal/copyright/index.epx for additional trademark information and notices.

Some software products marketed by SAP SE and its distributors contain proprietary software components of other software vendors.

National product specifications may vary.

These materials are provided by SAP SE or an SAP affiliate company for informational purposes only, without representation or warranty of any kind, and SAP SE or its affiliated companies shall not be liable for errors or omissions with respect to the materials. The only warranties for SAP SE or SAP affiliate company products and services are those that are set forth in the express warranty statements accompanying such products and services, if any. Nothing herein should be construed as constituting an additional warranty.

In particular, SAP SE or its affiliated companies have no obligation to pursue any course of business outlined in this document or any related presentation, or to develop or release any functionality mentioned therein. This document, or any related presentation, and SAP SE’s or its affiliated companies’ strategy and possible future developments, products, and/or platform directions and functionality are all subject to change and may be changed by SAP SE or its affiliated companies at any time for any reason without notice. The information in this document is not a commitment, promise, or legal obligation to deliver any material, code, or functionality. All forward-looking statements are subject to various risks and uncertainties that could cause actual results to differ materially from expectations. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of their dates, and they should not be relied upon in making purchasing decisions.
