Engagement from prospect,
to student life and beyond

A young man with brown hair and black-rimmed glasses is sitting on a red brick wall. He is wearing a grey hooded sweater over a blue collared shirt and dark blue jeans. He is holding a smartphone in his hands and looking down at it with a slight smile. The background shows a blurred green tree and a brick wall. A large green semi-transparent box is overlaid on the right side of the image, containing white text.

Duration: 4 years
Attendance: Flexible
Qualification: Certification IV
Way to study: Flexible
Start date: 01-03-2016
Faculty: Science faculty
Admission requirements: click here
Admission portal: click here

DESCRIPTION

Bachelor of Informatics is a flexible course designed for high achieving students who wish to pursue postgraduate study or employment requiring research and advanced IT development skills. The course provides a strong foundation in information technology leading to advanced studies in a chosen IT specialisation. These include Computer Science, Computing Technology, Business Information Systems, and Information Management. The course features a stream of hands on project-based work that gives students the opportunity to be involved in research right from the start through to the completion of the degree. In particular in the third year of the course students are required to undertake a 22 week placement in a research group or work unit of a participating company or organisation and in the fourth year undertake a substantial individual research project. The student's work during the placement will be structured and assessed as part of the degree.

INTEGRATION C4C

INTEGRATION C4C

INTEGRATION STRATEGY

INTEGRATE WITH SAP AND NON-SAP BACKENDS

SAP HANA Cloud Integration Technology

- Cloud-based multi-tenant technology for real-time process integration and data integration
- Design time with graphical flows and mappings
- Centralized monitoring and administration
- Community marketplace (planned)

iFlows (Prepackaged Integrations)

- Prepackaged integration flows with prebuilt logic for integration scenarios, routings, and mappings for:
 - SAP Cloud-SAP On Premise
 - SAP Cloud-SAP Cloud
 - SAP Cloud-3rd Party Clouds
- iFlows developed on SAP HANA Cloud Integration, NW PI, or point-to-point

Open APIs and Deployment Choice

- Rich set of open standards based APIs to build custom integrations
- To provide choices to customers, in addition to offering our own integration technologies, SAP also certifies connectors developed by third-party integration platforms like MuleSoft, Cast Iron, and Boomi
