The GHP offers infectious diseases physicians the opportunity to broaden their training to address health disparities in resource-poor settings. Residents extend their training by 24 months to attain core competencies in Global Health.

DEFINING CHARACTERISTICS
Trainees:
- Complete a 38-unit Master of Science in Global Health (MSc-GH) degree at Duke University
- Spend a total of nine months at a partner global health site, providing clinical care and conducting investigative research under the mentorship of Duke faculty
- Receive an annual salary and benefits package commensurate with their post-graduate year as well as a travel stipend. MSc-GH tuition is covered by the program.

ELIGIBILITY
Eligible candidates must complete an ACGME-accredited residency training program in Infectious Diseases prior to GHP enrollment in July. Criteria for candidate selection include:
- Strong recommendation from Residency Program Director
- Academic qualifications
- Demonstrated maturity, integrity, cross-cultural awareness and sensitivity
- Relevance of global health training to future career plans
- Prior international experience
- Strength of personal interview

APPLICATION & SELECTION PROCESS
Applications are accepted each Fall. A selection committee will interview top candidates and announce appointments shortly after the application deadline. All applications must include:
- Personal statement (1–3 pages) describing your reasons for pursuing the GHP
- Two letters of recommendation from faculty, including one from your Residency Program Director
- Curriculum Vitae

MISSION
The Global Health Pathway (GHP) for residents and fellows is committed to developing academic leaders in global health dedicated to reducing human suffering caused by health disparities. As a distinguished program that incorporates multiple departments, the GHP delivers tailored postgraduate training experiences integrating specialty-specific research opportunities, masters-level didactic training, and close mentorship to develop careers in global health.
