

Don't think we should burn fossil fuels? We don't either!

Coal, Oil, and Natural Gas Hurt **People** and the **Planet**

- Coal ash, oil spills, and fracking fluids dangerously pollute our drinking water
- Climate change is driving species to extinction, destroying habitats, creating devastating storms, and forcing millions to flee their homes
- Burning fossil fuels emits air pollutants that are harmful to both the environment and public health: causing lung cancer, bronchitis, asthma, etc.

We Support a Greener Future

Renewable Energy

Solar, Wind, Geothermal

Climate Action

International Agreements, Local Pledges

Price on Carbon

Money from Polluters to People

Sustainability

Energy Efficiency, Reducing Waste

Conservation

Species Preservation, Reforestation

Clean Infrastructure

Public Transportation, Electric Vehicles

Take Action TODAY

- ✓ Offset your carbon footprint at ucapture.com/elliott
- ✓ Check out OUR WEBPAGE to learn more information
- ✓ Call your elected officials to oppose fossil fuel usage
- ✓ Turn off your lights, unplug your chargers, less water
