Name of Potential Opportunity: International Education Research and Program Implementation Internship

Name and titles of potential supervisor/s (and link to external-facing RTI expert page, if available):
Name: Dr. Carmen Strigel
Title: Director, Technology for Education and Training

Overview: (2-4 sentences)
This internship will contribute to cutting edge research and implementation issues in international education. Specific tasks, among others to be jointly designed with the intern, might include:

- Literature review on using technology to assess soft skills, specifically creativity, among youth;
- Research on how low-income countries provide educational continuity during COVID-19;
- Support to the instructional design and implementation of blended/technology-facilitated learning programs ranging from low-tech (SMS/WhatsApp) to higher tech (eLearning module development, e.g., in Moodle);
- Support to monitoring and evaluation framework, methodology, and instrument design for blended/technology-facilitated learning programs;
- Support to research and development of policy briefs to help prepare countries’ transition back to in-class instruction and related impacts on student grade progression, student learning benchmarks, and student and teacher socio-emotional well-being.

Preferred skills: (including foreign languages, programming languages, etc.)

- Excellent literature, desk review, and writing skills (English)
- Experience designing and implementing research programs and/or monitoring and evaluation frameworks
- Self-starter, able to work with minimal supervision
- Experience in education preferred
- Experience in eLearning/education technology preferred

Number of Interns: 1
