Please list one or more specific things your TA does well to help you learn...

One of the major components of the class is learning to identify insects using a textbook guide. Jesse was great in helping us develop our identification skills, by walking us through difficult identifications in ways that ensured that we (the students) were the ones making the choices in the step-by-step identification process (rather than Jesse spoon-feeding us the answer). For instance, she might point out a step where we could have gone wrong, but then let us figure out where exactly we went wrong by re-examining our specimen more closely.

Jesse never fails to answer a question and is always incredibly helpful.

For identification labs, she finds the answer we're looking for and then works through the key backwards just to make sure we know how to figure it out.

willing to meet outside of class, will walk you through a quandary to find the solution

Jesse is very approachable and very fun to have as a TA.

Q15 - Please list one or more specific things your TA could improve upon to better help you learn.

Please list one or more specific things your TA could improve upon to bette...

I can't think of anything major that Jesse could improve upon.

Jesse could have a clearer understanding of assignment requirements.

Please write any other comments related to your TA.

Jesse was overall a great TA for entomology. She prepared lab materials ahead of time, assisted students in lab activities in constructive ways, and was readily accessible outside of class hours (for instance, she came into lab one weekend to answer our questions about our insect collection project). I would definitely take the class again with her as the TA!

She is amazing!
