

Section 2/Slide 4:

Be sure to apply what you have learned about the brain and human body to your written answers below.

Study the images with your group or partner then write down your thoughts on what your group thinks is happening in these images?

What are the differences and similarities you see in the images?

What could be the repercussions of what you see in the images be on a human?

Do you think these images show a positive or negative overall effect?
