6 - Please elaborate on your impressions of the quality of the course.

Response Rate	8/22 (36.36%)

• It gave me a holistic understanding of the product development.

• The course is really excellent. It would be great if the weekly assignments are team-based. And the final project is an individual project. This would help to learn in-depth and execute the course learning in the final individual project.

• The content of the course is great and Prof Dina teaches well.

• Very informative course packed with excellent information

• The course was overall good, got to learn important things like product roadmap.

• Good course, gave a proper overview of PM concepts

• The professor should improve her teaching skills

• The course gave a good understanding of the overall product development lifecycle and processes. It could also include a real-time element for product design to make the project more realistic and provide a hands-on experience to students.

8 - Please elaborate on your impressions of the quality of the instructor.

Response Rate	7/22 (31.82%)

• Professor has great experiences and knowledge by having worked in different companies and industry. However, sometimes her delivery is not clear and so this keeps us guessing as to what is expected out of us and our submission.

• The Professor is really great and humble to address all our questions and concerns.

• The professor should try to provide more explanation. She explains a lot more in detail when we ask questions so we feel we maybe mising out on her knowledge unless we ask a question.

• Prof Dina was really helpful in clearing our doubts, there is a scope of making the class more interactive.

• Can convey all info properly, also lenient with grading and encourages to make mistakes to learn

• She had lots of knowledge, but she needs to improve her communication and course updates on sakai

• Prof. Dina is fantastic and facilitates a good interaction among students during class. Her slide deck is comprehensive and offers a good learning experience. She includes interesting videos in the course content to help students understand the concepts better.

18 - Open-Ended QuestionsWhat parts of the class were most useful for you? Why?

Response Rate	6/22 (27.27%)

- working on a semester long project and following up with professor helped me have hands-on learning.
- Class assignments are really productive and great learning experience.
- Final project, PM Lingo, class assignments helped put to practise the concepts we learn
- The Product concepts
- Assignments
- The end-to-end project experience in MPD was extremely helpful. We got to apply concepts learned in class on our project.

19 - What parts of the class were least useful for you? Why?

Response Rate	5/22 (22.73%)

- class assignments were not as useful. Instead, if there would be more discussion about the chapters of book recommended then it will be more helpful.
- The class needs to be more interactive in terms of sharing ideas.
- INNOV8 simulation - did not understand the game
- Some concepts felt a little repetitive with other classes
- Simulations

20 - Please add any additional comments or suggestions for improving the learning experience in this course.

Response Rate	4/22 (18.18%)

- none.
- It would be great if students can work on at least 2 projects. One throughout the semester and the second as the final individual project.
- Reduce course syllabus and focus more on specific things
- As mentioned above, it would be helpful to have a real-time element associated with the project to offer a better hands-on experience to students.
