### 6 - Please elaborate on your impressions of the quality of the course.

- Great Content
- The course book chosen is good. But we could use more assignments and projects to be using the tools that we discuss in the class. the final project presentation theme can be conducted twice or even thrice.
- I liked the course content, focus on JIRA and Confluence was a great plus
- The course provided the application of a systematic, disciplined approach to the development, operation, and maintenance of software using the Agile manifesto principles.
- Great course to learn & share the frameworks used in practical life at work scenarios.

### 7 - Give an overall rating for quality of the instructor (e.g., presentation, knowledge, fairness, responsiveness).

- Professor has great knowledge and tries to explain concepts with examples.
- nice
- He tries to associate every learning to any type of personal experience which is informative.
- Prof is very knowledgeable, he delivered the content well. Made class interesting with the latest tech news, and talking about stories from his professional experiences was great.
- He is very personable and enjoys teaching. He also takes the time and energy to improve and make sure that we have a great learning experience. However, although he structures the class discussions very well, he sometimes has trouble getting all students to participate. Nevertheless, she is an awesome instructor.
- Amazing Professor. He kept a well balance in sharing his practical experience at work with the textual contexts of book. His teaching style was even more engaging as he allowed and made students share their experiences. Real examples teach more & engage more conversations

- Apart from just being a professor doing his job of teaching us the subject, he also cared about life of students beyond it. He helped us with learning what kind of work is what we must aim for. He enabled us to leverage our experience in tough markets. Blessed & wished the best. Motivated in tough times.
