

Fall 2019

Duke Microbiome Center

Welcome to the DMC newsletter!

This quarterly newsletter is provided by the Duke Microbiome Center to inform the Duke University community about activities, resources, news, funding and educational opportunities, and recent highlights in the microbiome sciences at Duke and beyond. If you have items you would like for us to include in a future newsletter, or if you would like to add someone to our newsletter listserv to receive future issues, please email [Pat Massard](#). For further information on the DMC, please visit our [website](#).

First National Microbiome Center Meeting

The Duke Microbiome Center helped organize the first National Microbiome Center Meeting, which took place in Irvine, CA on July 11th, 2019. In attendance were representatives from roughly two dozen other American universities' microbiome centers and initiatives, as well as journal editors and philanthropic foundation staff. The overall goals of the meeting were to: 1) discuss the roles of microbiome centers within universities; 2) share best practices for center research services, teaching, and outreach, and 3) identify

microbiome research and policy areas in which inter-center coordination would benefit. Ideas that were presented by meeting attendees included the creation of institutional data repositories for 16S rRNA gene sequencing data, coordination of culture collections within and between universities, and standardization of human study protocol verbiage for institutional review boards. Meeting products are expected to include a website for member centers, a summary white paper for journal submission, and a follow-up meeting in June, 2020 in Chicago, IL.

Lawrence David, Ph.D.

Associate Director, Duke Microbiome Center

Duke Symposium on Food Systems, Nutrition and the Microbiome on Tuesday November 12

Duke University's Symposium on Food Systems, Nutrition, and the Microbiome will be held 9AM-5PM on Tuesday, November 12th, 2019, in the Great Hall at Trent Semans Center, Duke University School of Medicine.

Food systems are fundamental to human, animal, and planetary health. The availability and composition of food in turn has shaped the evolution of human and animal physiology and can contribute to diverse metabolic diseases. The microbiome is increasingly appreciated as an integral part of this continuum from agriculture to nutritional physiology. The goal of this symposium is to explore the frontiers of the exciting interactions between food systems, nutrition, and the microbiome, and emerging medical, ethical, and policy implications.

For more information about the symposium, go [here](#).

Computational Resources at Duke

Microbiome research frequently relies on computational approaches, and we are fortunate at Duke to have a wide range of computing resources available. To help DMC members understand and navigate this rich landscape, the DMC Bioinformatics Group has developed a new [Computational Resource](#) page which describes those available assets and explains the differences between them. Click [here](#) to learn more.

Funding opportunities through the DMC

The DMC has one active funding opportunity:

DMC Rolling Voucher Program: Duke University has established shared resources that avail state-of-the-art technologies to interrogate microbiome structure and function to Duke investigators. The Duke Microbiome Center offers a rolling voucher program to provide its investigators access to these shared resources, particularly for microbiome projects that are not yet externally funded. Eligibility is limited to Duke Microbiome Center faculty and their trainees, and the maximum budget is \$5,000. There is no deadline for these proposals. For more information, see [the program announcement](#).

Upcoming DMC meetings

DMC Microbiome Lunches: This monthly research-in-progress series is held on third Wednesdays at 12PM in CARL 0010, and is open to the entire DMC community. The schedule of speakers can be viewed [here](#). If you would like to present your work in a future DMC Microbiome Lunch, please contact [Pat Massard](#).

DMC Faculty Meetings: The next DMC faculty meeting will be January 29th, 1PM, in CIEMAS 2240. Future DMC faculty meetings will be 4/22, with all meetings at 1PM in CIEMAS 2240 (lunch provided).

Please mark your calendars now!

Core Facility Highlights

The DMC supports and advises several core facilities at Duke that support the microbiome sciences. This includes the [Duke Microbiome Shared Resource](#), the [Duke Genomics Analysis and Bioinformatics Shared Resource](#), and the [Duke Gnotobiotic Core](#). In this newsletter we highlight ...

Upcoming Conferences

For a full list of upcoming microbiome conferences, click [here](#).

Microbiome Funding Opportunities

Noster & Science Microbiome Prize \$25,000 (see [here](#)) 1/24/2020

Microbiome and Aging: Impact on Health and Disease (R01 Clinical Trial Not Allowed) Award Amount: See solicitation for details (see [here](#)) 10/31/2019

Modulating Intestinal Microbiota to Enhance Protective Immune Responses against Cancer (R01 Clinical Trial Not Allowed) Award Amount: See solicitation for details (see [here](#)) 11/6/2019
