People
Environment
Shortage of nursing staff
Distance from nursing station to room
Delays in PT/OT consults
Bathrooms too small for additional assistance
Pt. perception of falls risk
Room clutter
Increase in patient falls
Lack of flags to alert staff to changes in status
Handoff process not specific to new risks over the shift
Lack of walker/device assistance on unit
Inability to rank urgency of referrals
Documentation lacks specificity
Additional equipment in room increases clutter
Lack of in person sitters, increase in remote observers (may be a benefit)
Education process not tailored to individual pop. needs
