7:30 am – 5:15 pm

American Society for Surgery of the Hand
& American Association for Hand Surgery

“Disasters of the Masters”

Accreditation

8.50 AMA PRA Category 1 Credits™

Description

Complications occur for all surgeons. At times these complications are daunting and require knowledge on how to handle these effectively. The complications may require specific salvage techniques, the understanding of when to intervene when complications occur, and the communication and ethics required to treat patients compassionately when complications occur. Are these complications or errors in execution? What is the difference? What are the pitfalls in what appears to be straightforward treatment resulting in disasters? The answers to these questions will be the subject of the symposium.

Learning Objectives

Review common upper extremity procedures with emphasis on common and unusual complications requiring intervention and management.

L. Scott Levin, MD, FACS, Program Co-Chair

Thomas B. Hughes, MD, Program Co-Chair

Session I – Hand

7:30 am – 7:35 am	Introductions L. Scott Levin, MD, FACS, Thomas B. Hughes, MD, William H. Seitz, Jr., MD, Peter M. Murray, MD
7:35 am – 7:41 am	Tendon repair with scarring John G. Seiler, III, MD
7:41 am – 7:47 am	Tendon repair with rupture John G. Seiler, III, MD
7:47 am – 7:53 am	Failed Hunter Rod A. Lee Osterman, MD
7:53 am – 7:59 am	Complications after rheumatoid surgery Sanjeev Kakar, MD
7:59 am – 8:05 am	Finger fracture nonunion Thomas J. Fischer, MD
8:05 am – 8:25 am	Discussion Q&A
8:25 am – 8:31 am	Failed implant arthroplasty of the MCP joints Marco Rizzo, MD
8:31 am – 8:37 am	Persistent PIP instability after fx/dislocation TBD
8:37 am – 8:48 am	CMC pain and instability in the young patient Jennifer Moriatis Wolf, MD
8:43 am – 8:54 am	CMC collapse after arthroplasty Steven Z. Glickel, MD

8:49 am – 9:00 am "Its just tendinitis" problems after trigger and dequervains surgery
R. Glenn Gaston, MD

9:00 am – 9:15 am Discussion Q&A

Session II – Wrist

9:15 am – 9:21 am DRUJ resection and instability leading to one bone forearm
Luis R. Scheker, MD

9:21 am – 9:27 am Scaphoid nonunion s/p ORIF
TBD

9:27 am – 9:33 am Missed Carpal Fractures/Delayed Treatment
Robert A. Kaufmann, MD

9:33 am – 9:39 am Persistent pain after TFCC repair/debridement
Jeffrey Yao, MD

9:39 am – 9:45 am Persistent carpal instability after surgery-what to do before salvage
TBD

9:45 am – 9:51 am Four corner fusion nonunion
Edward Akelman, MD

9:51 am – 9:57 am Distal radius fracture with volar subluxation after ORIF
Diego L. Fernandez, MD

9:57 am – 10:30 am Discussion Q&A

10:30 am – 10:40 am Break

10:40 am – 10:46 am Dupuytren's surgery gone bad
Peter J. Stern, MD

Session III – Soft Tissue

10:46 am – 10:52 am Recurrence after Collagenase
Jeffrey B. Friedrich, MD

10:52 am – 10:58 am Failed Replant – toe transfer, distraction
Milan V. Stevanovic, MD

10:58 am – 11:04 am Failed free flap
William C. Pederson, MD, FACS

11:04 am – 11:10 am Recurrent ganglion
Fraser J. Leversedge, MD

11:10 am – 11:16 am Missed diagnosis in Sarcoma
Edward A. Athanasian, MD

11:16 am – 11:40 am Discussion Q&A

11:40 am – 11:46 am Plexus-failed nerve transfer or FFMT
Scott W. Wolfe, MD

11:46 am – 11:52 am	Pediatric Plexus – unsatisfactory Results/ unsatisfied parents <i>Dan A. Zlotolow, MD</i>
11:52 am – 11:58 am	Failed CTR <i>Ryan P. Calfee, MD, MSc</i>
11:58 am – 12:04 pm	Ulnar nerve instability after decompression <i>TBD</i>
12:04 pm – 12:25 pm	Discussion Q&A
12:25 pm – 1:15 pm	Lunch

Session IV – Nerve

1:15 pm – 1:21 pm	Iatrogenic Nerve injury <i>Robert J. Goitz, MD</i>
1:21 pm – 1:27 pm	Insensibility after nerve repair <i>Gregory M. Buncke, MD</i>
1:27 pm – 1:33 pm	Neuroma after nerve repair <i>Steve K. Lee, MD</i>
1:33 pm – 1:39 pm	Failed/Infected nerve tube – What now <i>Jonathan E. Isaacs, MD</i>
1:39 pm – 2:00 pm	Discussion Q&A

Session V – Elbow

2:00 pm – 2:06 pm	Revision Total elbow <i>Graham J. King, MD, FRCSC</i>
2:06 pm – 2:12 pm	Distal humeral nonunion <i>Robert N. Hotchkiss, MD</i>
2:12 pm – 2:18 pm	Persistent elbow instability after fixation of triad <i>Felix H. Savoie, III, MD</i>
2:18 pm – 2:24 pm	Elbow arthroscopy Isn't so Easy – Complications after a "simple scope" <i>Mark E. Baratz, MD</i>
2:24 pm – 2:30 pm	Rerupture after Distal biceps repair <i>Christopher C. Schmidt, MD</i>
2:30 pm – 2:36 pm	Loss of fixation in elderly olecranon fracture <i>Jesse B. Jupiter, MD</i>
2:36 pm – 3:10 pm	Discussion Q&A
3:10 pm – 3:20 pm	Break

Session VI – Shoulder

3:20 pm – 3:26 pm	Failed RCR <i>Evan Flatow, MD</i>
3:26 pm – 3:32 pm	Proximal humeral fracture nonunion <i>TBD</i>
3:32 pm – 3:38 pm	Infected TSA <i>David Glaser, MD</i>
3:38 pm – 3:44 pm	Persistent pain after TSA <i>Russ Huffman, MD</i>
3:44 pm – 3:50 pm	Recurrent dislocation after labral repair <i>William H. Seitz, Jr., MD</i>
3:50 pm – 4:15 pm	Discussion Q&A

Session VII – Potporri

4:15 pm – 4:21 pm	When the transplant fails <i>Jaimie T. Shores, MD</i>
4:21 pm – 4:27 pm	Perfect surgery, unhappy patient <i>William B. Kleinman, MD</i>
4:27 pm – 4:33 pm	Imperfect surgery, unhappy patient <i>Douglas P. Hanel, MD</i>
4:33 pm – 4:39 pm	Coding and billing – when the patient has questions <i>TBD</i>
4:39 pm – 4:45 pm	Practice management – The disruptive patient <i>Fabian Marechal, MS. Ec.</i>
4:45 pm – 4:51 pm	Practice management – My patient is better, but won't go back to work <i>Mark Rekant, MD</i>
4:51 pm – 5:15 pm	Discussion Q&A
	Adjourn
