Practice call/roll play with Duke resources, week 2 script

Phone Script

1. Hi, I'm \_\_\_\_\_. Am I speaking with Mr. Jones?

*{Wait for response}*

2. I'm calling from Duke Student Resource Center. My role here is to help students work with resources for things like student wellness, libraries, and academic support. I know you had a recent visit to our office and were referred to Perkins Library and Duke Student Health. I'd love to follow-up on how that went. Is now a good time to have a brief call?

*{Wait for response}*

3. Thank you for your time Mr. Jones! I'll start with a few questions if that's ok. And of course the information we discuss will be kept confidential. Your advisor told me that you were given some resources or information regarding Perkins Library and Duke Student Health. We really want to hear about your interest and experiences with these services. I'm first wondering which one of these you felt was the most important to you?

*{Wait for response}*

Let's talk about that one today. Were you able to visit or connect with \_\_\_\_\_?

**[if student responds NO]**

Are you still interested in connecting with [the resource]?

*[if yes interested, see prompts below]*

Were there any reasons you weren't able to connect with [the resource]?

*{Wait for response}*

That makes a lot of sense. Is there any information I can provide you about this service?

*[if not interested, see prompts below]*

Was there anything that made you interested in the initial referral? I'm wondering if anything changed for you that made you change your mind about [the resource].

*[if the student responds YES, was able to visit/connect with service, then proceed]*

(easiest to access)      10      9      8      7      6      5      4      3      2      1

*[if anything less than 10]:*

i. I'm interested in your experience. What led you to score this a # = [highly/not] of being easy to access?

ii. What would have made this experience a 10?

#### Utility

Thanks for sharing. I understand it was [validate previous response]. Once you actually got [the service], on a scale from 1-10, 10 being the most useful, how useful was the service?
